Defoamer 500

Concentrated Sump Side Defoamer

Description

Defoamer 500 is a highly concentrated defoaming agent based on a paintable and platable modified siloxane with an emulsifying system that is compatible with most metalworking fluids. It is designed for use in metalworking fluids and parts washing systems.

Performance Benefits

- Very low dosage rates
- Compatible with most water extendable metalworking fluids
- Gentle on skin
- Highly effective in high pressure systems
- Excellent for use in large central coolant and washer systems

Typical Properties

Appearance	Off-white Liquid
Specific Gravity @ 77°F	0.970
pH (Concentrate)	6.5 to 7.5

Recommended Dosage & Application

- The recommended addition rate is 8 to 16 ounces per 1000 gallons.
- Shake or stir well before using.
- For best results premix Defoamer 500 in a pail of the in-use fluid and then add it to the system.
