

# ORGANOMET POWDER

Odor and pH control

## Description

**ORGANOMET POWDER** is designed to be used in small sumps, usually of 200 gallons or less to eliminate and prevent sulfide odors and to stabilize the pH of the in-use fluid. **ORGANOMET POWDER** also reduces the biofilm, a breeding ground for bacteria and fungi as well as neutralizes endotoxins released from the micro-organisms found in metalworking fluids. Safe and easy to use, **ORGANOMET POWDER** is the most effective way to control odors in any water-based system.

## Performance Benefits

- Quickly eliminates sulfur based odors
- Safe to handle. Very gentle to the skin
- Compatible with all known coolants
- Works in coolants, washers, and water based degreasers
- Safe on most metals
- Does not contain sulfur, chlorides or fluorides

## Recommended Applications & Dilutions

Coolant systems for individual machines should use 1 4-oz scoop of **ORGANOMET POWDER** for every 50 to 100 gallons (200 to 400 liters) of fluid in the sump. Each treatment will last between one and two weeks depending on how much the machine is used, type of material machined, etc. **ORGANOMET POWDER** is compatible with all metalworking fluids that have foul odors.

## Characteristics

| Properties          | Unit | Test Method | Value       |
|---------------------|------|-------------|-------------|
| Appearance          | -    | Visual      | Blue Powder |
| pH of 0.1% solution | -    | -           | 9.0         |
| Nitrites            |      | -           | No          |
| Phenols             |      | -           | No          |
